

Vino Therapy – New Ways to Enjoy the Benefits of Wine

Wine Country Naturals™ (WCN) is an exciting new Vino Therapy skin care line featuring the wonderful health benefits of antioxidants found in high-quality natural grape extracts. All of the WCN products use extracts from Napa and Sonoma County wine grapes.

Wine businesses throughout the North Bay in California are starting to offer this line for sale in their tasting rooms and gift shops including tasting rooms as far away as Michigan. By promoting Vino Therapy as an added health benefit, tasting room managers are discovering an extra source of income in these tougher economic times. One thing you can count on is that people continue to purchase products that make them feel better about themselves, so there has not been a down turn in sales of skin care products to any extent.

Because the WCN products are made with the finest botanicals, wine grapes and grapeseeds containing beneficial ingredients and antioxidants, they are also starting to appear in spas, salons, hotels, wine clubs, gift shops, boutiques, specialty gift baskets and gourmet food stores. The products now available by Wine Country Naturals™ include:

- Chardonnay-Pear Essence Body Butter
- Zinfandel-Currant Essence Mud Masque
- Cabernet-Plum Essence Salt Scrub
- Chardonnay-Honey Essence Hand Lotion

A new spa line called Vino Bello is currently in development and

will feature several more products suitable for spas and hotels, including amenities.

Wine Country Naturals™ products may be found at many locations and at www.winecountrynaturals.com. For more information, contact Annie Holman at (707) 773-3336.
